SUMMARY

A third year undergraduate student in Information Technology who is passionate on learning and seeking new experience to imply the skills learnt through educational knowledge. Aspiring Software Development Engineer exited at the prospect of structuring data in a professional setting.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, CS Fundamentals

Full Stack development: HTML, CSS, JS, React.js, MongoDB, Node.js

DSA: Arrays, Stack, Queue, Binary search, Trees, LinkedList etc

PROJECTS

ML Projects

April 2024 – June 2024

Deepneural network, Computer vision models

Python, TensorFlow, Keras

- Developed a deep neural network model to predict data relationships, achieving a 95% accuracy rate and reducing manual analysis time by 40% in the first quarter.
- Engineered an advanced computer vision algorithm for Fashion MNIST dataset with TensorFlow, Keras, Python, and Matplotlib; increased model accuracy to 90%, reducing misclassification rate by 15%.
- Implemented computer vision model using convolution neural network (CNN).

Web Projects

April 2024 – January 2025

HTML, CSS, JavaScript, React.js

- Built a landing page using HTML and CSS.
- Created an e-commerce website using HTML, CSS, JavaScript, integrated with a Tawk chatbot
- Developed a full-stack career guidance platform with a chatbot, offering resources on entrepreneurship, skills, career opportunities, and higher studies in India and abroad using React, Node.js, and MongoDB.

EXPERIENCE

AICTE Ai-MI Intern

April 2024 – May 2024

Virtual

- ML models were designed, and algorithms for clustering, regression, and classification were designed and put into practice for practical uses.
- Preprocessing of the data: To improve model accuracy, feature engineering, data transformation, and cleaning were carried out.
- Joint ventures: worked in groups to solve AI problems and presented results for input from mentors and peers.

Full Stack Developer Intern

August 2024 – January 2025

BVRIT

- Developed a career guidance platform for computer science students, including resources on entrepreneurship, skills, career opportunities, and higher studies.
- Built frontend (React) and backend (Node.js) components, integrating a chatbot for user assistance.
- Collaborated using **GitHub** for version control, **Slack** for team communication, and deployed the application for seamless access.

EDUCATION

BV Raju Institute of Technology

B.Tech in Information Technology

Narsapur, Telangana

oct 2022 – oct 2026

Expected Graduation

oct 2026

Current CGPA 9.5

CERTIFICATIONS

- Programming in Java,NPTEL 2024
- Microsoft AI Skills challenge Certificate
- The Joy of computing using Python,NPTEL 2023
- Event Coordinator at Promethean(Tech Fest 2023)
- Certificate of Appreciation for Academic Excellence.
- Oracle Database Programming with SQL
